[2017 March Microsoft Official New Released 70-741 Dumps in Lead2pass.com! 100% Free Download! 100% Pass Guaranteed!](#)

There is no need to hassle if you are stuck in the 70-741 exam difficulties, Lead2pass will assist you right through 70-741 exam with 70-741 PDF and VCE dumps. Lead2pass delivers the most comprehensive 70-741 exam preparation material, covering each and every aspect of 70-741 exam curriculum. We ensure you 100% success in 70-741 exam. Following questions and answers are all new published by Microsoft Official Exam Center: <http://www.lead2pass.com/70-741.html> QUESTION 1 Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this sections, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. You network contains an Active Directory domain named contoso.com. The domain contains a DHCP server named Server1. All client computers run Windows 10 and are configured as DHCP clients. Your helpdesk received calls today from users who failed to access the network from their Windows 10 computer. You open the DHCP console as shown in the exhibit. (Click the Exhibit button.) You need to ensure that all of the Windows 10 computers can receive a DHCP lease. Solution: You activate the scope. Does this meet the goal? A. Yes B. No Answer: A Explanation:

Each question in the series contains a unique solution. Determine whether the solution meets the stated goals. Your network contains an Active Directory domain named contoso.com. The domain contains a DNS server named Server1. All client computers run Windows 10. On Server1, you have the following zone configuration. You have the following subnets defined on Server1. You need to prevent Server1 from resolving queries from DNS clients located on Subnet4. Server1 must resolve queries from all other DNS clients. Solution: From Windows Firewall with Advanced Security on Server1, you create an inbound rule. Does this meet the goal? A. Yes B. No Answer: B Explanation:

Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this sections, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. You network contains an Active Directory domain named contoso.com. The domain contains a member server named Server1 that runs Windows Server 2016 and has the DNS Server role installed. Automatic scavenging of state records is enabled and the scavenging period is set to 10 days. All client computers dynamically register their names in the contoso.com DNS zone on Server1. You discover that the names of multiple client computers that were removed from the network several weeks ago can still be resolved. You need to configure Server1 to automatically remove the records of the client computers that have been offline for more than 10 days. Solution: You run the dnscmd.exe command and specify the /AgeAllRecords parameter for the zone. Does this meet the goal? A. Yes B. No Answer: B Explanation: [https://technet.microsoft.com/en-us/library/cc772069\(v=ws.11\).aspx](https://technet.microsoft.com/en-us/library/cc772069(v=ws.11).aspx) QUESTION 4

Hotspot Question You network contains an Active Directory named contoso.com. The domain contains two servers named Server1 and Server2 that run Windows Server 2016. Server1 has IP Address Management (IPAM) installed. Server2 has the DHCP Server role installed. The IPAM server retrieves data from Server2. The domain has two users named User1 and User2 and a group named Group1. User1 is the only member of Group1. Server1 has one IPAM access policy. You edit the access policy as shown in the Policy exhibit. (Click the Exhibit button.) The DHCP scopes are configured as shown in the Scopes Exhibit. (Click the Exhibit button.) For each of the following statements, select Yes if the statement is true. Otherwise, select No. Answer: Explanation:

[https://technet.microsoft.com/en-us/library/dn268500\(v=ws.11\).aspx](https://technet.microsoft.com/en-us/library/dn268500(v=ws.11).aspx) QUESTION 5 Note: This question is part of a series of questions that use the same or similar answer choices. An answer choice may be correct for more than one question in the series. Each question is independent of the other questions in this series. Information and details provided in a question apply only to that question. You have a DHCP server named Server1 that has three network cards. Each network card is configured to use a static IP address. Each network card connects to a different network segment. Server1 has an IPv4 scope named Scope1. You need to ensure that Server1 only uses one network card when leasing IP addresses in Scope1. What should you do? A. From the properties of Scope1, modify the Conflict detection attempts setting. B. From the properties of Scope1, configure Name Protection. C. From the properties of IPv4, configure the bindings. D. From IPv4, create a new filter. E. From the properties of Scope1, create an exclusion range. F. From IPv4, run the DHCP Policy Configuration Wizard. G. From Control Panel, modify the properties of Ethernet. H. From Scope1, create a reservation. Answer: C Explanation:

questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this sections, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. You network contains an Active Directory domain named contoso.com. The domain contains a DHCP server named Server1. All client computers run Windows 10 and are configured as DHCP clients. Your helpdesk received calls today from users who failed to access the network from their Windows 10 computer. You open the DHCP console as shown in the exhibit. (Click the Exhibit button.) You need to ensure that all of the Windows 10 computers can receive a DHCP lease. Solution: You start the DHCP Server service. Does this meet the goal? A. Yes B. No Answer: B Explanation:

[https://technet.microsoft.com/en-us/library/dd183581\(v=ws.10\).aspx](https://technet.microsoft.com/en-us/library/dd183581(v=ws.10).aspx) QUESTION 7 Your company has a main office in London and a branch office in Seattle. The offices connect to each other by using a WAN link. In the London office, you have a Distributed File System (DFS) server named FS1 that contains a folder named Folder1. In the Seattle office, you have a DFS server named FS2. All servers run Windows Server 2016. You configure replication of Folder1 to FS2. Users in both offices frequently add files in Folder1. You monitor DFS Replication, and you discover excessive replication over the WAN link during business hours. You need to reduce the amount of bandwidth used for replication during business hours. The solution must ensure that the users can continue to save content to Folder1. What should you do? A. Modify the quota settings on Folder1 on FS2. B. Modify the properties of the replication group. C. Configure the copy of Folder1 on FS2 as read-only. D. Modify the replicated folder properties of Folder1 on FS1. Answer: B We highly recommend our 70-741 dumps. Comparing with others', Lead2pass is the most credible and authentic source of information on 70-741 exam and we strive to keep our 70-741 dumps up-to-date and reliable on a consistent basis. Our exam preparation material is rich in variety. We offer 70-741 PDF format and 70-741 practice test with free VCE player. That's the reason why many candidates choose Lead2pass. 70-741 new questions on Google Drive:
